- **Design and grade separation of two intersections to bridged interchanges on Perth's Reid Highway**
- **More efficient traffic flow and increased safety on one of the region's busiest freight corridors**

Vienna/Perth, 26 September 2025 Since joining the STRABAG Group in March 2025, Australian infrastructure specialist Georgiou Group has secured a major contract in Perth WA to deliver the Reid Highway upgrades for client, Department of Main Roads Western Australia. The design and build contract, valued at approximately 125 million euros, includes the modernisation of the Altone Road and Drumpellier Drive/Daviot Road intersections on Reid Highway. The project aims to reduce congestion and improve safety and traffic flow in Perth's northeastern corridor. Preparatory works have commenced, with completion scheduled for 2028.

Improved mobility infrastructure for Perth's northeast

The Reid Highway is one of the region's busiest freight routes and forms part of the strategically important east-west connection across Perth, the capital of Western Australia. The replacement with grade-separated interchanges will reduce congestion and ensure more reliable and safer freight transport. Moreover, it will improve conditions for commuters.

Additionally, a new bridge and several underpasses will enhance access for cyclists and pedestrians to the popular Swan Valley wine and tourism region. The project is jointly funded by the Australian Federal Government and the Government of Western Australia.

"Georgiou and STRABAG are proud to be delivering this major infrastructure project in Australia," says Siegfried Wanker, Member of the Management Board for STRABAG SE's International + Special Divisions segment. "Australia is a prime example of our principle of global-local presence. This project marks a milestone in our shared journey and highlights the potential of our long-term partnership."

Local expertise meets international strength

With the acquisition of Georgiou Group, STRABAG now has a broad-based presence in Australia. Georgiou benefits from the expertise and resources of a global corporation. For STRABAG, the merger represents a strategic expansion of its country portfolio – Australia stands out with stable conditions and high compliance standards. At the same time, STRABAG doubles its non-European business and strengthens its long-term resilience.

STRABAG SE is a European-based technology group for construction services, a leader in innovation and financial strength. Our activities span all areas of the construction industry and cover the entire construction value chain. We create added value for our clients by taking an end-to-end view of construction over the entire life cycle – from planning and design to construction, operation and facility management to redevelopment or demolition. In all of our work, we accept responsibility for people and the environment: We are shaping the future of construction and are making significant investments in our portfolio of more than 250 innovation and 400 sustainability projects. Through the hard work and dedication of our approximately 86,000 employees, we generate an annual output volume of around € 19 billion.

Our dense network of subsidiaries in various European countries and on other continents extends our area of operation far beyond the borders of Austria and Germany. Working together with strong partners, we are pursuing a clear goal: to design, build and operate construction projects in a way that protects the climate and conserves resources.
