- **STRABAG and Stumpp join forces in the growing market for infrastructure projects**
- **Strengthening of regional presence in southern Germany**
- **Stumpp Group with annual revenue of approx. € 90 million**

Vienna, 23 July 2025 Gebr. Stumpp GmbH & Co. KG, based in Balingen in southwestern Germany, is set to become part of STRABAG AG, Cologne. The move strengthens STRABAG's regional presence between the Black Forest and Lake Constance and expands its capacities in the growing market for infrastructure projects. The Stumpp Group recently generated an annual revenue of around € 90 million with a workforce of nearly 300 employees. The purchase agreement was signed and is subject to approval by the relevant authorities.

The Stumpp Group specialises in road construction and civil engineering, including earthworks as well as sewer and pipeline construction. The company also operates asphalt mixing plants and holds investments in gravel works. STRABAG is thereby securing long-term access to essential raw materials for future infrastructure projects in the region.

"We are pleased to welcome a well-established family business with an experienced workforce to our Group. This partnership is an important step towards further strengthening our infrastructure expertise both regionally and nationally," says Jörg Rösler, member of the Management Board of STRABAG SE responsible for the North + West segment.

"Joining forces with the STRABAG Group not only secures all our employees' jobs but also creates a strong basis for the continued growth of our company, which has been firmly established and recognised in the market for decades," says Arne Stumpp, Managing Partner and majority shareholder of the Stumpp Group.

***STRABAG SE** is a European-based technology group for construction services, a leader in innovation and financial strength. Our activities span all areas of the construction industry and cover the entire construction value chain. We create added value for our clients by taking an end-to-end view of construction over the entire life*

cycle – from planning and design to construction, operation and facility management to redevelopment or demolition. In all of our work, we accept responsibility for people and the environment: We are shaping the future of construction and are making significant investments in our portfolio of more than 250 innovation and 400 sustainability projects. Through the hard work and dedication of our approximately 86,000 employees, we generate an annual output volume of around € 19 billion.

Our dense network of subsidiaries in various European countries and on other continents extends our area of operation far beyond the borders of Austria and Germany. Working together with strong partners, we are pursuing a clear goal: to design, build and operate construction projects in a way that protects the climate and conserves resources.
