Vienna, 27 January 2025 8.36 a.m.

The Management Board of STRABAG SE hereby discloses that, based on the information currently available, it expects an EBIT margin close to 6% for the 2024 financial year. The forecast is based on an evaluation of key performance indicators completed today. At around € 19.2 billion, the 2024 output volume should remain roughly on a par with the previous year's figure.

Earnings for the 2024 financial year are now expected to be significantly higher than previously forecast. The higher EBIT margin is primarily due to positive earnings effects in the North + West segment and the lower negative impact on earnings in the volatile international project business compared to the previous year. In the North + West segment, performance exceeded expectations in Germany in particular. This was due in part to the milder weather conditions, which led to higher capacity utilisation in December, but is also a result of agreements reached towards the end of the year on supplementary claims from major projects.

The final initial figures for the 2024 financial year, including the guidance for 2025, will be published as planned on 13 February 2025.

***STRABAG SE** is a European-based technology group for construction services, a leader in innovation and financial strength. Our activities span all areas of the construction industry and cover the entire construction value chain. We create added value for our clients by taking an end-to-end view of construction over the entire life cycle – from planning and design to construction, operation and facility management to redevelopment or demolition. In all of our work, we accept responsibility for people and the environment: We are shaping the future of construction and are making significant investments in our portfolio of more than 250 innovation and 400 sustainability projects. Through the hard work and dedication of our approximately 86,000 employees, we generate an annual output volume of around € 19 billion.*

Our dense network of subsidiaries in various European countries and on other continents extends our area of operation far beyond the borders of Austria and Germany. Working together with strong partners, we are pursuing a clear goal: to design, build and operate construction projects in a way that protects the climate and conserves resources.
