The contract covers the installation, operation and maintenance of a new traffic surveillance system covering an area of 85 km² with 227 cameras and 63 pan-tilt-zoom (PTZ) cameras, red light surveillance systems with 74 cameras, and other traffic management components. Construction will take place over 12 months, followed by 60 months of operation and maintenance.

"India has one of the largest but by no means densest road and rail networks in the world. Yet despite constant modifications, traffic often collapses," says Thomas Birtel, CEO of STRABAG SE. The reasons for this lie in the growth of the population, which is not matched by transport planning and urban planning, as well as in the high number of commuters. The introduction of the new transportation system will increase traffic safety. Traffic control, which reduces overall travel time and minimises traffic jams, will also help reduce high traffic volumes.

EFKON GmbH, a subsidiary of European construction company STRABAG SE, is one of the world's leading providers of Intelligent Transportation Systems (ITS), Electronic Toll Collection (ETC), enforcement and traffic telematic solutions. EFKON has significant know-how in all major electronic tolling technologies and provides customised turnkey solutions. Headquartered in Raaba by Graz, Austria, EFKON's activities are worldwide. Subsidiaries are located in Belgium, Ireland, Malaysia, India and South Africa.

STRABAG SE is a European-based technology partner for construction services, a leader in innovation and financial strength. Our services span all areas of the construction industry and cover the entire construction value chain. We create added value for our clients by our specialised entities integrating the most diverse services and assuming responsibility for them. We bring together people, materials and

machinery at the right place and at the right time in order to realise even complex construction projects – on schedule, of the highest quality and at the best price. The hard work and dedication of our more than 75,000 employees allow us to generate an annual output volume of around € 16 billion. At the same time, a dense network of numerous subsidiaries in many European countries and on other continents is helping to expand our area of operation far beyond the borders of Austria and Germany.
