Vienna, 6 August 2025 STRABAG SE announces that Alfred Watzl, member of the Management Board for the South + East segment, has declared his resignation from the Management Board in mutual agreement with the Supervisory Board. Alfred Watzl intends to pursue new professional opportunities: "I look back with gratitude on my career at STRABAG and will of course be available to ensure a smooth transition, helping to secure the continued positive development of the segment. I am truly grateful to all colleagues for 26 years of successful collaboration."

Kerstin Gelbmann, Chairwoman of the Supervisory Board, thanks him on behalf of the Supervisory Board and his fellow board members for his many years of service to the company, including six years as a member of the Management Board, and wishes him great success in his future endeavours.

The Presidential and Nomination Committee has already begun its work to promptly organise the succession.

STRABAG SE is a European-based technology group for construction services, a leader in innovation and financial strength. Our activities span all areas of the construction industry and cover the entire construction value chain. We create added value for our clients by taking an end-to-end view of construction over the entire life cycle – from planning and design to construction, operation and facility management to redevelopment or demolition. In all of our work, we accept responsibility for people and the environment: We are shaping the future of construction and are making significant investments in our portfolio of more than 250 innovation and 400 sustainability projects. Through the hard work and dedication of our approximately 86,000 employees, we generate an annual output volume of around € 19 billion.

Our dense network of subsidiaries in various European countries and on other continents extends our area of operation far beyond the borders of Austria and Germany. Working together with strong partners, we are pursuing a clear goal: to design, build and operate construction projects in a way that protects the climate and conserves resources.
