- **STRABAG GmbH, Ed. Züblin AG and Züblin Spezialtiefbau GmbH working together to realise 4.8 km six-lane expansion of A8 motorway near Pforzheim**
- **Large-scale contract includes construction of six bridges and 380 m long noise protection enclosure**
- **Work to start in September**

Vienna, 9 August 2021 The STRABAG Group has been awarded a new large-scale contract in the southwestern German state of Baden-Württemberg. Germany's federal motorway company, Autobahn GmbH des Bundes, has awarded to STRABAG the contract for the six-lane expansion of the A8 motorway in the Enz Valley near Pforzheim. The contract for the complex infrastructure project on the main corridor between Karlsruhe and Stuttgart is worth more than € 100 million. In addition to the widening of a 4.8 km long section of motorway between the Pforzheim-Nord and Pforzheim-Süd interchanges, the project also includes the construction of a total of six bridges and underpasses as well as the realisation of extensive noise protection measures. Three German subsidiaries of STRABAG SE will be implementing the project as a team, with lead contractor STRABAG GmbH supported in its work by teams from Ed. Züblin AG and Züblin Spezialtiefbau GmbH. Construction will start in September. The entire project is expected to be completed by the end of 2026 after about five years of work.

"We are very pleased to have been awarded the contract for this challenging motorway project in Germany and are proud of the faith this demonstrates in the performance of our corporate entities in the field of infrastructure construction," says Thomas Birtel, CEO of STRABAG SE.

Upgrade of Pforzheim-Ost interchange

The Enz Valley crossing is one of two remaining sections of the A8 motorway in Baden-Württemberg that remains to be widened from four to six lanes. In addition to the 4.8 km long expansion, the works also include the widening of the B10 to four lanes at the Pforzheim-Ost interchange, the upgrade of that interchange with improved on- and off-ramps, the replacement of several grade-separated crossings, the replacement of the bridge over the river Enz, the construction of a
