CLIENT:
Ministry of Transport, Communication
and Information Technology,
Sultanate of Oman

- **Extensive expansion of 18th of November and Al Mouj Streets in Muscat**
- **Complex construction project with flyover, underpasses and signal-controlled intersections**
- **STRABAG strengthens its presence in Oman with new corporate office building**

Vienna/Muscat, 26 November 2025 STRABAG Oman LLC has been awarded the contract for the expansion of the centrally located 18th of November and Al Mouj Streets in Muscat – a key project for improving the transport infrastructure in the capital of Oman. The construction project, commissioned by the Ministry of Transport, Communications and Information Technology, involves widening the street named after the birthday of Oman's late Sultan Qaboos bin Said to three lanes, building a flyover and underpasses, and redesigning several roundabouts into signal-controlled intersections. This will reduce congestion on the city's main transport corridor, improve connections to Muscat International Airport, Sultan Qaboos Highway and Muscat Expressway, for instance, and increase safety along the route.

The project covers a length of 8.7 kilometres and will be completed in 30 months starting in January 2026. The contract value is around 102 million euros. As the general contractor, STRABAG Oman is not only responsible for the execution of the project, but also for part of the planning. The work is being carried out while traffic continues to flow, with temporary diversions in place.

Siegfried Wanker, the STRABAG SE Management Board Member responsible for the International + Special Divisions segment, emphasises: "The expansion of 18th of November Street demonstrates our commitment to improving mobility in Muscat. This project is a key milestone in our long-standing presence in the region. It showcases our expertise in implementing sustainable infrastructure solutions using cutting-edge methods like LEAN construction and BIM. Oman is and remains a strategically important market for STRABAG, a fact we are also underlining with the construction of a modern corporate headquarters in the capital."

The plan is to construct the STRABAG headquarters in the west of Muscat at a cost of 12.4 million euros. The building has five levels

and a gross floor area of around 7,500 m². The first two floors will mainly serve as a car park with 57 parking spaces, while the upper floors will house modern office space for around 150 workplaces. The building's design is impressive thanks to the balanced mix of three types of façade: a plastered perforated façade, a post-and-beam construction with glass elements, and a traditional mashrabiya, which provides light protection and privacy in Islamic architecture. Completion is scheduled for spring 2027.

STRABAG has been active in the Middle East since the 1970s – initially in Oman, later also in the United Arab Emirates. Today, STRABAG employs around 3,000 people in the region and most recently generated an annual output of around 260 million euros with an order backlog of around 500 million euros. In Abu Dhabi, STRABAG is currently executing the prestigious "Sea La Vie" project, recently completed the modernisation of the Al Ain Museum, and is working on major infrastructure projects in Oman, including the new road link from Duqm Airport to Ras Markaz.

STRABAG SE is a European-based technology group for construction services, a leader in innovation and financial strength. Our activities span all areas of the construction industry and cover the entire construction value chain. We create added value for our clients by taking an end-to-end view of construction over the entire life cycle – from planning and design to construction, operation and facility management to redevelopment or demolition. In all of our work, we accept responsibility for people and the environment: We are shaping the future of construction and are making significant investments in our portfolio of more than 250 innovation and 400 sustainability projects. Through the hard work and dedication of our approximately 86,000 employees, we generate an annual output volume of around € 19 billion.

Our dense network of subsidiaries in various European countries and on other continents extends our area of operation far beyond the borders of Austria and Germany. Working together with strong partners, we are pursuing a clear goal: to design, build and operate construction projects in a way that protects the climate and conserves resources.
